

Marine Botany

What is marine botany?

Are there plants in the sea?

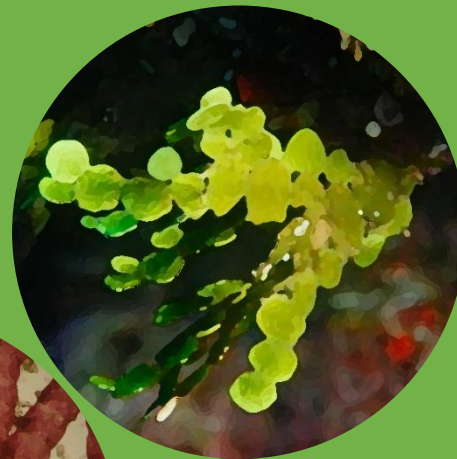

What is the difference between algae and seagrass?

What species are endemic in the Mediterranean Sea?

How are animals connected to algae and seagrass?

How are humans and algae connected?

Are algae toxic?

This course will provide students the knowledge about the systematics, biology and ecology of marine algae and seagrass, with emphasis on the species in the Adriatic and Mediterranean Sea. Students will gain information about the role and importance of algae and seagrass in marine, but also Earth ecosystems, as well as in human society.
